Sea mom & Dad,

The package came Monday. Thank you very much - & like the shirt and have worn one to work. Vishie was surprised and very pleased to get a present too.

Last month we were invited to rubnik idear for independent research projects. I proposed a cosmic ray experiment that bound had thought of but hadrix obtained fundingfor. They weren't door interested until & changed it to mention the possibility of cosmic vary damage to havy satellites. how it has progressed up the ladder and the technical director of NWL will make the final decision in two weeks. If he like it & will collaborate with Hound and we will visit Usu for a few days. The experiment would take place on an ice island in the anctic! Still, chances are against getting the money since it is a little tight this year. more later -

Jem
